PROFILE

Frontend developer who builds clean, responsive web applications, from patient-management dashboards to money-transfer apps. Comfortable with the full workflow: planning, building, collaborating through GitHub branches, testing and deploying to Vercel.

SKILLS

Frontend: HTML5, CSS3, JavaScript, Next.js, responsive design

Data: Database design and implementation

Workflow: Git, GitHub, branching, Vercel deployment, teamwork

EXPERIENCE

Web Programming 2 years

Wrote clean, efficient code for web applications using JavaScript, HTML and CSS.

Databases 2 years

Designed and implemented database solutions.

Web and App Development 1 year

Designed and developed web and mobile applications.

Software Engineering / Teamwork 1 year

Planned work, used GitHub for version control and collaboration, worked with branches, tested and deployed on Vercel without breaking other people's work.

PROJECTS

Good Hands Dental Care

Web app for managing appointments and patient records.

Live: dental-care-dashboard-kjlk.vercel.app

NAS Money Transfer

Secure app for sending and receiving money.

Live: nas-next-app.vercel.app

Nuba Hands - Relief and Health Tracker

Web application for tracking health metrics and providing relief services to underserved communities.

Live: samaritan-aid.vercel.app

NCA Safe Space (frontend)

Secure, user-centered web platform that gives students a safe and confidential environment.

Live: nca-safe-space-frontend.vercel.app
